ABDUL AZIZ

Industrial Electrical Technician | Motor Control & Electrical Wiring

Phone: +92 3452489424 | Email: abdulaziz.elec6@gmail.com

PROFESSIONAL SUMMARY

Entry-level Industrial Electrical Technician with hands-on training in motor control wiring and electrical drawing, currently studying for a DAE in Electrical Technology alongside an Industrial Electrician course. Combines practical wiring ability with a clear understanding of control circuit operation and safe working practice. Seeking an entry-level industrial electrical maintenance role in a factory, mill or electrical contractor, with a long-term interest in automation.

TECHNICAL SKILLS

MOTOR CONTROL DOL Starter | Star-Delta Starter | Forward-Reverse Starter | Contactor Interlocking | Three-Phase Motor Control

SWITCHGEAR & PROTECTION Contactors | Control Relays | Timer Relays | Overload Relays | MCBs | MCCBs | Fuses

CONTROL PANEL COMPONENTS Push Buttons | Selector Switches | Indicator Lamps | Terminal Blocks | DIN Rails | Wiring Ducts

ELECTRICAL INSTALLATION Domestic Wiring | Lighting Circuits | Switches and Sockets | Distribution Board Connections

SAFETY Electrical Isolation | Safe Working Practices | Protection Awareness

PRACTICAL ELECTRICAL EXPERIENCE

Hands-on training, Industrial Electrician Course *(practical work completed in the first six months)*

- **Assembled and wired** DOL and Star-Delta motor starters, covering both power and control circuits.
- **Connected** contactors, auxiliary contacts, timer relays and overload relays according to the circuit diagram.
- **Applied** NO/NC contacts and electrical interlocking to achieve the correct operating sequence, including timer-controlled Star-Delta changeover.
- **Identified** power and control components and studied control panel layout, including forward-reverse starter circuits.
- **Wired** domestic lighting circuits, switches, sockets and basic distribution board connections, following isolation and safe working procedures.

ELECTRICAL DIAGRAMS

- Draw motor starter power and control circuit diagrams using standard symbols and terminal numbering.
- Read and interpret diagrams to trace the sequence of operation and match it to the physical wiring.

EDUCATION AND PROFESSIONAL TRAINING

EDUCATION

DAE in Electrical Technology — First Year | Currently Studying

Matriculation — Completed

PROFESSIONAL TRAINING

Industrial Electrician Course — First 6 Months Completed | Ongoing

1.5-year program

COMPUTER SKILLS

MS Word | MS Excel | MS PowerPoint | HTML | CSS | JavaScript | React

LANGUAGES

English | Urdu
